## Resume

- Oceanographer specialized in acquisition, processing and analysis of hydrographic and geophysical data – MBES bathymetry, backscatter, magnetometry, ADCP, CTD, waves, currents and tides.
- Offshore and remote experience in UXO, cable-route, windfarm and decommissioning surveys across Europe and Brazil, using RTK/DGPS precise positioning.
- Advanced Python for data-processing automation, reporting and multisource integration, combined with GIS analysis (QGIS, ArcGIS, Global Mapper).
- Additional training in Cyber Defense (FIAP), bringing a rigorous approach to the protection and management of sensitive project data.

## Professional Experience

October 2021 – Now

### Freelance - DataProcessor

- MBES processing through the softwares: QPS Qimera and FMGT, EIVA NaviEdit and Navimodel, Beamworx AutoClean and AutoPatch. Data validation, calibration, backscatter, quality control, deliverables production.
- Multisource Data Integration: Combining bathymetric data with other geospatial data sources and Python for comprehensive analysis.

Qimera   AutoClean   Eiva   NaviEdit   Navimodel   QGIS   FMGT   Python   GlobalMapper

November 2022 – May 2024

### Mazars

- Internal and External Pentesting
- Pentesting on Web Applications
- Implementation of Security Policies following guidelines from CMN, Bacen, CVM, NIST, and ISO 27K
- Monitoring, auditing, and assessing the maturity of information security processes
- Analysis and mitigation of risks and vulnerabilities in cyber security systems, applications, processes, and infrastructures.
- Automate internal processes, creating interactive dashboards and web systems

Pentest   Audit   Vulnerability Assessment
